TRANSITION METAL IONS DOPED BLENDED POLYMER COMPOSITES

LAP Lambert Academic Publishing Jul 2016, 2016. Taschenbuch. Book Condition: Neu. 220x150x8 mm. Neuware - In recent years, metal-organic coordination polymers have been attracting a great deal of interest in the field of supramolecular chemistry and in developing certain functional materials. Bridging N-donor ligands have generally been used because of their strong extension ability both in covalent bonding and supramolecular interactions (H-bonding and aromatic stacking). Polyethylene oxide (PEO) is an interesting base material because of its high thermal stability and PEO...

Reviews

The ideal pdf i at any time read. I am quite late in start reading this one, but better then never. You will like the way the author create this book.

-- **Eliane Bednar**

This publication is fantastic. It really is full of knowledge and wisdom You are going to like just how the author write this publication.
