America Star Books. Hardcover. Book Condition: New. Hardcover. 28 pages. Dimensions: 8.5in. x 5.5in. x 0.2in. The world we know today is full of many unexplained events. The evidence tells us that our past may have been a lot more interesting than we once thought. The Universe is not only billions of years old, but may have many planets much like Earth with many Human-like species. If Humans can exist on Earth in this modern world, could we rule out the fact we may not be alone in the Universe and maybe Humans have been here millions of years ago, or even billions, with all the evidence lost in time. If Humans did survive on planet Earth millions of years ago, how much evidence would be left behind? I don't think any Human could answer the question we all want to know. How did we get here and where are we going? I do know one thing for sure, this world will end at some point in time and Humans will have no choice but to move on in the Universe or face doom on an unforgiving world. Maybe we already have and Earth is not our home at all. Maybe we came from far away from another solar system or maybe something else put us here. The real question is, do we really want to know? This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
